

# DK LOGIC 100

Room thermostat

Cat. no. 105001

## DEVICE DESCRIPTION

The DK LOGIC 100 is intended for controlling a heating device (gas, coal, electric boiler) directly or through control modules. The thermostat maintains a set temperature in the apartment by sending a signal to the heating device (opening or closing contact).

## THE DEVICE OFFERS THE FOLLOWING FUNCTIONS:

- possibility of choosing different programmes for each day of the week
- two factory programmes and a third custom
- two temperature choices - day and night
- six heating periods during a day
- easy and intuitive programming method
- possibility of short-term heating temperature changes
- controlled hysteresis from 0.1°C to 2°C
- temperature readout correction from -5 °C to +5 °C in 0.1°C steps
- freeze protection
- heating control in 0.5 °C increments
- multi-function display
- all settings saved in memory, even in case of a long-term lack of battery

TECHNICAL SPECIFICATIONS	DK LOGIC 100
Power	alkaline batteries 2 x 1.5 V type AA/LR6
Number of programmes	2 + 1 custom
Hysteresis	from 0.1 °C to 2 °C
Min. programmable time	10 minutes
Heating range	from 5 °C to 39 °C
Temperature setpoint accuracy	0.5 °C
Temp. measurement error	+/- 0,5 °C
Output	max. 5 A / 250 V
Number of heating periods	6 per day
